### **DETAILED ACTION**

Claims 56-67 are under consideration in this application.

Claims 32-55 and 68-75 remain held withdrawn from consideration as being drawn to nonelected subject matter 37 CFR 1.142(b).

#### ***Election/Restrictions***

The requirement is still deemed sound and proper and is therefore made FINAL. It is suggested that the non-elected claims be deleted.

This application contains claims 32-55 and 68-75 drawn to an invention nonelected with traverse in the reply filed on May 8, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 56 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Again, note that the notation of form I is not an universal identification of compounds. It is recommended that the chemical nature of the product i.e. crystalline (+)-(S)-clopidogrel hydrogen sulphate with, PXRD pattern....etc. be incorporated so that a specific “product” can be identified by the claims.

Applicants merely assert that other U.S. patents refer to Form I clopidrogrel hydrogen sulfate. This is not persuasive because an allowed application has no bearing

Art Unit: 1625

on the merits of the instant application. It is well recognized that the pharmaceutical art requires clear identification of the product for which description and physical characterization must be made. Chemical identity of a crystalline form should be clearly described through elemental analysis, X-ray diffraction, etc. Mere arguments by counsel does not take the place of any objective evidence. Moreover, X-ray diffraction patterns are not the sole parameter for chemical identification because the same chemical material with identical crystalline form can have drastically different powdered diffraction pattern while same X-ray diffraction pattern can be drawn to different chemicals. Note Bernstein, p. 118 vs. p.272, newly supplied to show factual evidence.

***Allowable Subject Matter***

Claims 57-67 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 56 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1625

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
